

Respirator Masks

FFP2 / FFP3* Virus Defence and Personal Protective Equipment (PPE)

A safer place
for you to
breathe.

Folding Respirator Mask - 2010 FFP2 -

Soft, light, fits

A soft and light mask moulds itself closer to the face. The F&F folding mask is a light, safe and comfortable mask. It has a large surface area that significantly reduces breathing resistance, even without a valve. The exhaled air is filtered to protect people nearby.

The nonwoven layers are free of additives. Dermatologically tested by the manufacturer and correspond to OEKO TEX Standard 100, Appendix 4, Product Class I (94.0.9942)

Filter

Internal high-performance filter made of meltblown polypropylene - Made in Germany. Manufactured by one of the most modern large-scale systems in the world (commissioning 2020)

Clip

Adjust the nose area of the mask with the solid aluminium clip.

Your glasses will not fog up! Do not accept masks that fog up your glasses. Don't wear them! If air can go out, it can also come in, with pollutants and with viruses!

Elastic band

The round tube elastic (Ø ≈ 5mm) is able to stretch to 250% length – Made by F & F–, without latex or rubber, perfectly matched for your comfort and safety!

Model	Filter*	Valve	Size	Avail.	Single wrap	pcs / box	box / carton	carton / Pal.	app. pcs / 40ftHC Container

 PFF2 (ABNT/NBR 13.698-2011 – Brazil)
 D2/D3 (Taiwan CNS 14755)

Cup Respirator Mask - 2060 FFP2 / 3060 FFP3* -

3D-Cup

The F&F 3D Cup-mask has a large surface area to significantly reduce breathing resistance even without a valve. The exhaled air is filtered to protect people nearby. You have great freedom of movement within the mask. No mask material touches your mouth even if you inhale heavily.

The inner and outer nonwoven layers are free of additives. Dermatologically tested by the manufacturer and correspond to OEKO TEX Standard 100, Appendix 4, Product Class I (94.0.9942)

Filter

Internal high-performance filter made of meltblown polypropylene - Made in Germany. Manufactured by one of the most modern large-scale systems in the world (commissioning 2020)

FIT

Premium Sealing Material. Extra wide, soft, flexible seal for a perfect fit on almost any face. FIT - it just fits.

noncytotoxic / ISO 10993 - 5:2009
non-sensitizing / ISO 10993
does not irritate the skin / ISO-10993

Clip

Adjust the nose area of the mask with the solid aluminium clip.

Your glasses will not fog up! Do not accept masks that fog up your glasses. Don't wear them! If air can go out, it can also come in, with pollutants and with viruses!

Elastic band

The 8mm elastic band wraps around the head twice and is able to stretch to 250% length
—Made by F&F—, without latex or rubber, perfectly matched for your comfort and safety!

Stopper

Band stopper, continuous adjustment of the band tension.

Bob-World-Champion

Francesco Friedrich and his team trust the 2060 mask

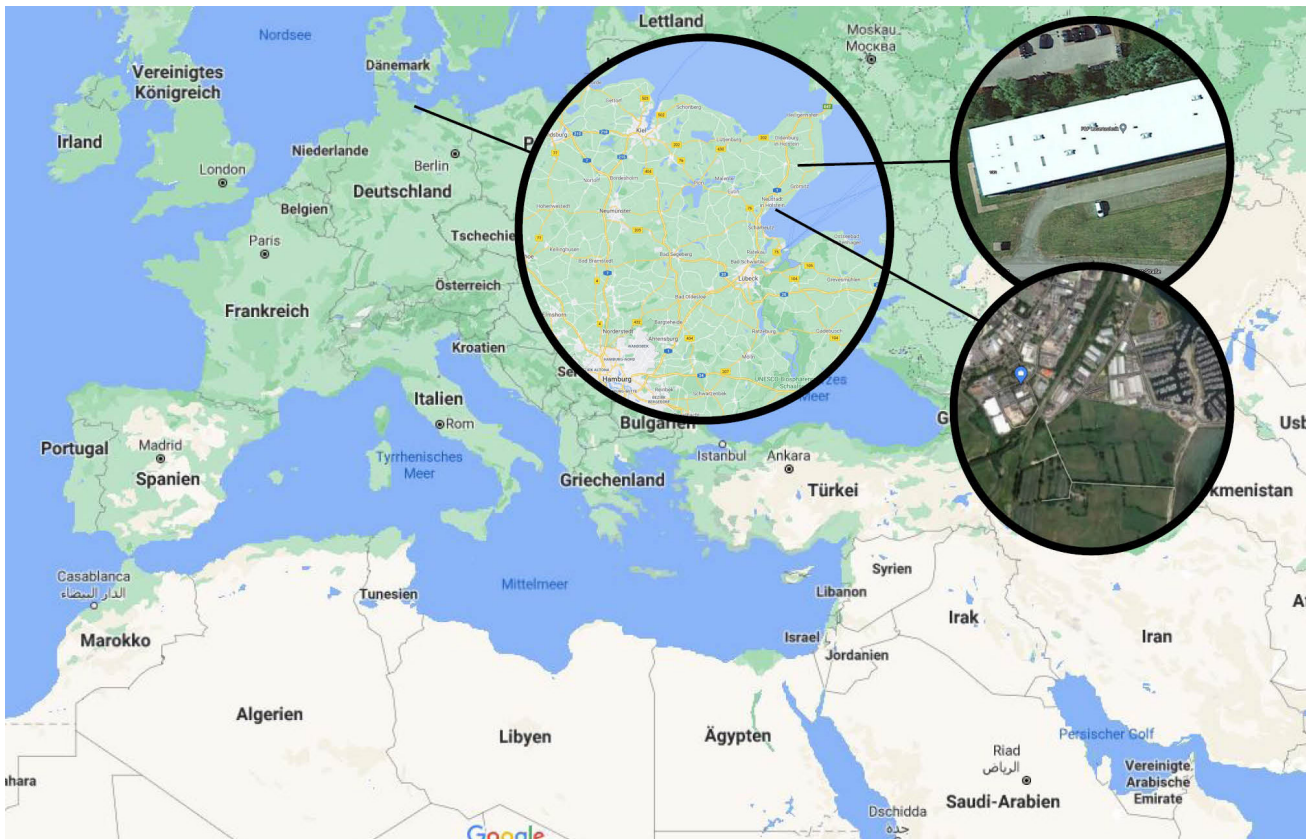

Francesco Friedrich is a convinced user of the F&F 2060 Cup Mask. When competing on the international bobsled tracks in Europe, USA, and Canada, Francesco and his teammates wear the F&F masks not only because they offer better protection than other FFP2 masks, but also because they enable the wearer to breathe more easily. That is especially helpful when it comes to giving interviews.

And then came the shock. Francesco contracted Corona Covid 19 at the end of the 2020/2021 season. He went into domestic quarantine. His wife and child were not infected. He was very worried about infecting his family, but did not want to miss out on his loved ones either. Francesco wore Model 2060 masks throughout the quarantine in his own home, wearing it to participate in family life. He only removed the mask in his own room, for eating and sleeping. His wife and child were protected by him wearing the Model 2060 cup mask!

Francesco Friedrich *2. Mai 1990 is a German bobsledder. He is the record world champion with eleven titles and the double Olympic champion in two-man bobsled and four-man bobsled in 2018. He also has the most World Cup victories to date. F&F has been active in international sport as a developer and producer of runners since 2011. Nico Walther won silver in the 4-man bobsled on F&F runners at Olympia 2018. Francesco Friedrich has been riding on F&F runners since the 2019/2020 season. In addition to World Cups, Team Friedrich became double European Champion and double World Champion. We look forward to a joint Olympics in Beijing in 2022.

F&F Lasertechnik

Who we are

Andreas Babbe and Jens Sager have been working together successfully for 30 years. For more than 13 years, Janine Kühl has complemented the management team with her expertise and commitment. Together, we have continuously developed the F&F Group at our production sites..

Neustadt:

A supplier for industrial metal processing since 2008. In addition to research and development in surface technologies, this plant also manufactures components for medical technology and mechanical engineering. Stainless steel, steel, aluminium, non-ferrous metals are laser cut, edged, welded, finished, assembled, etc..

Grube:

FFP2-FFP3 respirator masks are manufactured and developed here. The plant has its own laboratory and highly specialised fully automated production facilities.

Annual capacity

Cup masks	4 million pcs.
Folding masks	10 million pcs.
Total: FFP2 / FFP 3	14 million pcs.

F&F Lasertechnik employs around 95 people.
